

# BriskBard 1.2 Released With New Security Features

*The latest version of BriskBard has been released with phishing protection and many user suggested features.*

ZARAGOZA, ZARAGOZA, SPAIN, September 27, 2016 /EINPresswire.com/ -- Salvador Diaz Fau today announced the release of a new version of [BriskBard](#), the most comprehensive web browser for Windows. The version 1.2.0 is now completely free and also includes new security features, web search functionality and user interface enhancements.

According to the 'Webroot threat brief' and the 'Kaspersky Security Bulletin' there are hundreds of millions of malicious websites trying to deceive the users into installing malware or getting their bank account information, just to name a few of the threats. BriskBard protects the users with warnings if a website is considered suspicious by any of the two leading security services in Internet : PhishTank and Google Safe

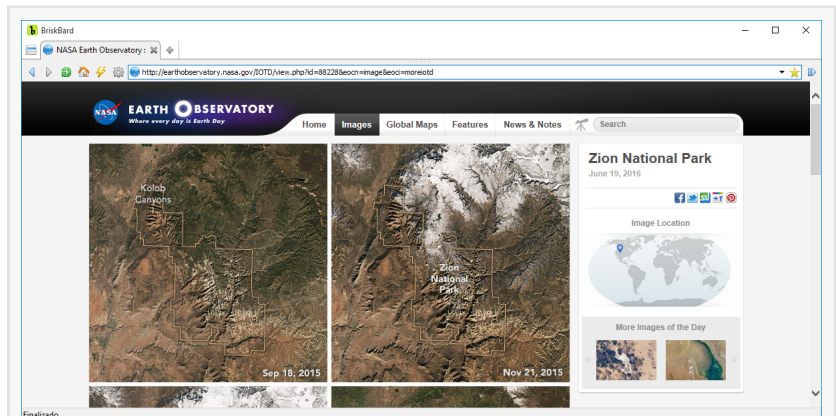

Browsing.

BriskBard integrates a web browser, an email client, a media player, a news aggregator, an FTP client, an IRC client, a newsgroups reader, a contact manager and many other services in one free application.

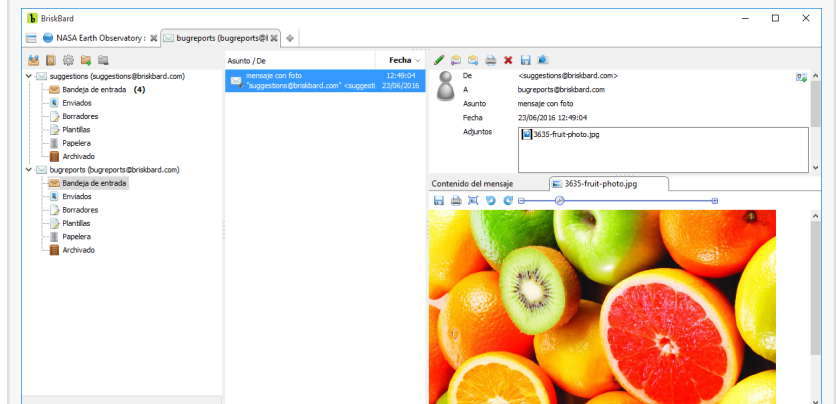

Among many other new features, this new version also has a configurable search box in the web browser and the user interface is now even easier to use thanks to the standard keyboard shortcuts.
