

Mixing In Stirred Tanks - A One Day Training Course, 18th October 2016, Dublin, Ireland.

DUBLIN, DUBLIN, IRELAND, September 27, 2016 /EINPresswire.com/ -- Tridiagonal Solutions Inc, is organizing Mixing in Stirred Tanks - a one day training program to enable chemist and chemical engineers with the latest mixing calculations and scale-up methods in the chemical process industry space.

This course will review principles of mixing in stirred tanks, provide recommendations for process design and scale-up, plus enable participants to apply these principles and recommendations to their mixing processes and problems. Additionally the course will explain how “MixIT – an enterprise software to predict stirred tank performance” can help facilitate knowledge management, collaboration and use of mixing science within a global organization to accelerate reactor design, process scale up, process optimization and troubleshooting associated with stirred tanks.

The training is taking place on Tuesday, 18 October 2016, 8 am IST at IPA Education & Training Centre, 57-61 Lansdowne Road, Ballsbridge, Dublin 4, Ireland. Registration instructions are available at <http://mixit.tridiagonal.com/mixing-in-stirred-tanks-dublin-ireland-one-day-training-18th-october>

The training is conducted by Dr. Ameya Durve and Tarang Bulchandani, who are members of the Chemical Reactor Engineering Group at Tridiagonal Solutions. Over the past years of their career, they have been focused on R&D, Design and Scale up of stirred tank reactors. Their work also includes topics on gas-liquid and solid-liquid flows in stirred tank reactors using experimental methods and computational modeling.

About MixIT

MixIT, a comprehensive, easy-to-use enterprise analysis software designed to predict stirred tank mixing performance, with a unique capability of automated [CFD analysis](#). MixIT enables enterprises to design, compare, scale-up (plant to lab scale) and analyze the performance of multiple [stirred tank reactors and bioreactors](#), by using standard correlations and advanced CFD models.

About Tridiagonal Solutions Inc

Tridiagonal Solutions Inc is an advanced engineering solutions provider with expertise in process performance enhancement and product development solutions for industrial clients worldwide. Their

portfolio includes process engineering, CFD, EFD, Discrete Element Modeling services and chemical mixing simulation products . Tridiagonal Solutions caters to the Chemical and Process, Oil and Gas, Consumer goods, Food, Electronics, Power Generation and Healthcare Industries.
