## Description

Wiseguyreports.Com Adds “Agricultural Biologicals -Market Demand, Growth, Opportunities and analysis of Top Key Player Forecast to 2021” To Its Research Database

Agricultural biologicals are crop protection inputs in agricultural practices, which are organic and ecological in nature. They prevent the use of synthetic and chemical fertilizers like biocides, genetic modifications, and other chemical fertilizers, which subsequently helps protect the environment. Biological sources like microbials, plant extracts, minerals, and biochemicals help farmers improve crop productivity, maintain plant health, and reduce plant stress. The entire practice is based on organic green manure, residues, animal manure, or other ecological (bio-control) techniques.

The analysts forecast the global agricultural biologicals market to grow at a CAGR of 14.49% during the period 2016-2020.
