

# Security Specialists Launches DragonFly Security System™ for Homeowners

*-New Low-Cost, "Create-Your-Own" Solution from Stamford-Based Security Provider Lets Homeowners See What's Happening in Real-Time*

STAMFORD, CT, USA, September 28, 2016 /EINPresswire.com/ -- [Security Specialists](#), LLC, a leading systems integrator and full-service solution provider of dynamic, high-performance, integrated life safety, electronic security, video surveillance and communications systems for commercial and residential clients, recently launched the [DragonFly](#) "create-your-own" security system for residential users.

Combining a "smartphone app" with an Ethernet-connected hub kit and a choice of internal and/or external MotionViewer® cameras, the DragonFly security system installs in minutes utilizing an existing home router. The hub can also be upgraded to accommodate Wi-Fi or cellular connections for more flexibility and service backup in the event of outages. Easy-to-follow setup instructions are provided through the DragonFly smartphone application.

"Every family and [homeowner](#) should feel secure in their residence and have the ability to keep track of their loved ones and property, at a cost that won't break the family budget," said Kimberly Rescigno, Director of Sales and Marketing at Security Specialists, LLC. "With the new DragonFly offering from our Alert Systems division, we are now able to provide cost-effective, high-quality, do-it-yourself video surveillance products with professional central station monitoring to all residential users, regardless of who they are or what their financial status is, as long as they have a smartphone and a home router."

Specifically designed to accommodate homes, dorm rooms, small offices and cabins, DragonFly Security System cameras mount inside or out and provide the user with the ability to set notification alerts, stream and view real-time video, or request snapshots of camera input. When a video alert shows a real threat, the user simply taps "dispatch" on their app to send the video to the professional monitoring station for dispatch to the police and first responders. Users opting for the Premium monitoring plan get video-verified alarms sent directly to the monitoring station for automatic action when they are unavailable.

The DragonFly application also allows remote arming and disarming of the system, adjustment of camera detection sensitivity, adding users, and inviting followers to create a virtual neighborhood and help increase community awareness of outdoor events. Accessing and managing accounts can also be handled via a desktop application if the user does not have access to a smartphone. The DragonFly system has received endorsements from law enforcement and is designed to help support priority police response. The DragonFly Security System technology has been endorsed by the National Sheriffs' Association.

## About Security Specialists:

Stamford-based Security Specialists is a leading systems integrator and full-service solution provider of dynamic, high-performance, integrated life safety, electronic security, video surveillance and communications systems for commercial and residential clients. A pioneer in the development of
