

# India's first e-book "State Of India's Environment 2016 - In Figures"

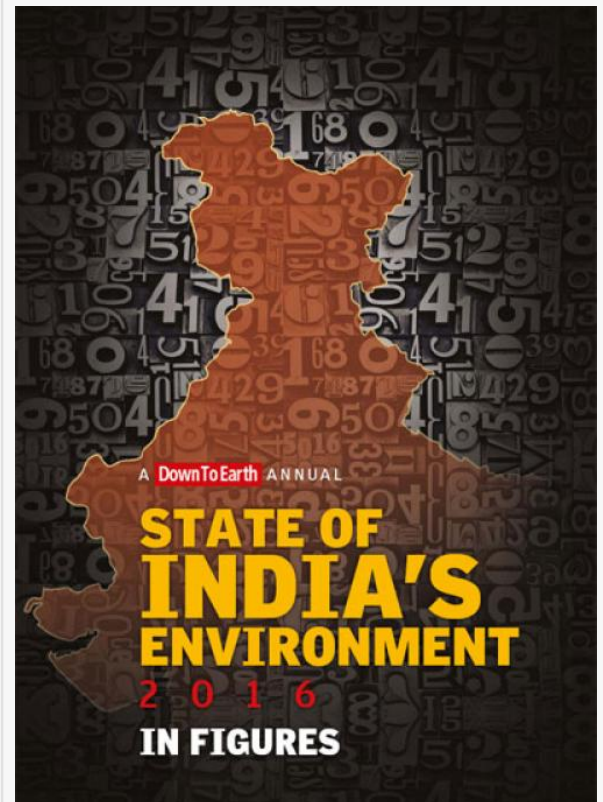

*This annual report uses data as the messenger. It communicates key developments around us in easy to digest and visually appealing ways to understand fast.*

NEW DELHI, INDIA, September 30, 2016  
/EINPresswire.com/ -- India's first e-book "State Of India's Environment 2016: In figures"

We are now in a time when data is overflowing; information is available from so many sources and so fast that sometimes we end up not making any sense of the happenings. So, processing data and information is the new way to communicate.

And this annual report published by [Centre for Science and Environment](#) uses data as the messenger. It communicates key developments around us in easy to digest and visually appealing ways to understand fast. It demystifies complex issues through data series.

The report has been organised into two broad sections: the key news of the year just gone by (April 2015-March 2016) in numbers and the next section is the state of key aspects related to environment. While the first section works as the digest for the last year and gives you the perspectives of developments in number, the second section is your data library for ever on key environmental aspects of the country. By adding this report to your e-collection, you are creating your own library of data that is comparable and can be used for research and referral.

At a time when views are getting sold as news in high-decibel TV talk shows and newspaper edits, "State of India's Environment 2016: In Figures" showcases all the important facts and headline numbers that will help form an informed opinion on issues that

At a time when views are getting sold as news in high-decibel TV talk shows and newspaper edits, "State of India's Environment 2016: In Figures" showcases all the important facts and headline numbers that will help form an informed opinion on issues that matter in India

Editorial and research directions: Sunita Narain and Richard Mahapatra  
Authors: Kiran Pandey and Rajit Sengupta
