This market report from Stratview Research studies the global spoolable pipe market over the period 2010 to 2021. The research report provides detailed insights on the market dynamics to enable informed business decision making and growth strategy formulation based on the opportunities present in the market.

The Global Spoolable Pipe Market: Highlights

Stratview Research foresees a robust growth of 6.5% CAGR in the global spoolable pipe market over the next five years (2016 – 2021), which offers an opportunity to the pipe and end user industry players to align themselves with the market growth. Despite the short term fluctuations in the reinforced spoolable pipe demand mainly due to the decreasing oil & gas price, the long term business outlook seems promising with good growth potential during the forecast period. Fiber reinforced spoolable pipe is likely to gain more market traction in the upcoming years by replacing steel pipes in the high pressure applications.

Onshore applications are expected to remain the growth driver of the global reinforced spoolable pipe market during the forecast period. In terms of region, North America is expected to remain the largest market for reinforced spoolable pipe during the forecast period.

The key reinforced spoolable pipe manufacturers are NOV Fiberglass (Fiberspar), Airborne Oil & Gas, DeepFlex, Flexpipe System, Flexsteel, and Pipe Life. New product development, collaboration with customers, and regional expansion are the key strategies adopted by the key players to gain
