

UFSDA offers Heat Sanitized Wood Chips to the UK, Belgium, Germany, France & Others

Wood chips to meet Phytosanitation standards for Heat Treatment, inspected and tested by USDA-APHIS to obtain Export Certificate issued by USDA to EU codes

NASHVILLE , TENNESSEE, USA, October 2, 2016 /EINPresswire.com/ -- [Aeon Energy](#) announces the launch of “UFSDA, LLC. “Our company was created to focus on marketing and selling the robust fibre products line of business promoted and sold through Aeon Energy Solutions, Inc.” “Aeon Energy has separated our advanced Torrefaction equipment and Wood Sanitation equipment lines from our Clean Fuels /fibre products bringing these clean fuels to Domestic and International markets. Worldwide demand for cleaner fuels to meet Regulatory and consumer demands has allowed Aeon to split our marketing resources into distinct lines of business to ensure effective and efficient delivery of these renewable, green energy products and our advanced clean tech production equipment.

“

Our Sanitized Chip products meet all Heat Based sanitation standards issued by the EU without any damage to the chip . Our system can also dry to your spec. increasing overall energy value per tonne

Pete Majka-Director

[SANITIZED WOOD CHIPS](#) are primarily delivered to UFSDA

for the European market by Maine Biomass Exports, Inc. (MBE) located in Maine, USA. UFSDA is the exclusive direct global agent for Maine Biomass Exports. MBE was established for the purpose of processing wood chips, for Combined Heat and Power (CHP) generation and MDF uses, in accordance to EU Phytosanitation standards. MBE is headquartered in Maine with other biomass operation interests situated along the eastern coastline of the United States from Maine to Florida. The founder Arthur House, and core associates of MBE have a combined industry experience of over 75 years in fiber sourcing, transportation, processing and manufacturing, marketing and exporting biomass. MBE wood chips, produced from log-length feedstock from timberlands in the vast Maine wood basket, can be processed and exported as bulk chips and or baled, wrapped and bar-coded bundles. All fiber will be harvested in accordance to Sustainable Forestry Initiative (SFI) Standards based on certain requirements intended to promote sustainable forest management and stewardship. All wood chips and export fiber will meet Phytosanitation standards for Heat Treatment, as prescribed by the EU and monitored, inspected and tested by USDA-APHIS so as to obtain an Export Phytosanitation Certificate to be issued by USDA prior to sailing. MBE wood chips are used in the manufacture of paper pulp, particleboard, medium density fiber board and for the generation of clean, renewable energy in biomass fired power plants. The Phytosanitation facility is anticipated to run two production lines and produce approximately 600,000 MTPY of bulk and baled fiber/chips, and an additional Heat Treatment process is planned to sanitize coniferous - pine, spruce, fir and hemlock logs, for export via Searsport, Maine. Initial production is planned to produce (on an exclusive basis) up to 300,000 CBM annually of Heat Treated logs commencing late Q4 2017. Currently wood fuel chips are available for EU customers which are produced from wood species in North America not requiring sanitation or fumigation under present EU codes & restrictions for import.

UFSDA, LLC is a Sourcing, Development, Sales, and Energy consulting firm. Their principal focus is on the green renewable fuels sector centered on clean energy and green renewable fuel production

derived from various Biomass feed stocks. UFSDA continually strives to develop a diverse list of customers who demonstrate a need for green fuels delivered in many of the available forms today for the green renewable energy sector. UFSDA's core strengths lie in its only partnering directly for a select group of well established, financially strong producers who are capable of consistently delivering quality, sustainable products in large quantities. The company fulfills their role as either a direct representative of or stakeholder in many of the partners selected. Presently UFSDA is focused on, true Torrefied (Black) Fuel Pellets, White Wood Fuel Pellets ,Wood Chips-Fuel grade, Whole Logs and sourcing/supplying of forest, manufacturing or saw mill residuals used in these types of products. For expedited service please contact us at 1-866-450-8159 or email info@ufsda.com
