

# At-Home Nail Fungus Treatment, Cure-Ex Laser, Now Available From iSkinProducts

*Clients see measurable results in as little as four weeks with 7 minutes of daily use. The patented technology is non-invasive safe, effective, and painless.*

MONTCLAIR, CA, USA, October 3, 2016 /EINPresswire.com/ -- Online beauty retailer, [iSkinProducts](http://iskinproducts.com), is pleased to offer the new [Cure-Ex](#) nail fungus laser treatment device. The portable device can be used on fingernails or toenails, and with a much lower cost than salon laser treatment, a user can use the Cure-Ex laser from the comfort of their own home.

The Cure-Ex [nail fungus treatment](#) device uses low laser therapy that combines pulse laser radiation to target fungus deep in the tissue beneath the nail bed; and blue light energy, which kills the fungus on the nail surface to prevent reinfection and encourage healthy nail growth.

Laser treatment for nail fungus has been proven to increase ATP molecules, energy-rich molecules that provide organic material needed to sustain life processes within the body. An influx of ATP molecules causes the fungus cells to cease making their own ATP, which stops the growth and begins the healing process.

While very common, nail fungus has long been a source of embarrassment for men and women alike. There are many medications and skin care products on the market that promise clearing, but only laser treatment has proven efficacy to quickly and painlessly kill nail fungus.

"Unfortunately, dermatological laser treatments and even those offered in med-spas can be out of reach for many people. The Cure-Ex nail fungus laser treatment is a one-time affordable device that delivers remarkable results at home. We do want to make consumers aware that there are many inauthentic laser products on the market that come from China. The Cure-Ex is only made in Israel and has patent copyrights protecting the technology," said Mike Barnea, CEO of iSkinProducts (<http://iskinproducts.com/>).

The Cure-Ex nail fungus laser treatment device is available at <http://iskinproducts.com/cure-ex.html> and for a limited time the company is offering an additional 25% off.
