“

I'm thrilled to be a part of this groundbreaking co. The first time I heard audio post AfterMaster, I knew that I had to be a part of this company and that we had something revolutionary on our hands.”

Justin Timberlake

Management believes they will be able to sell around 1 million units of its AfterMaster Pro product through the first full year of being on the shelves.

The BelaSigna 300 AM revolutionary audio chip was released after 6 years of development by AfterMaster Audio Labs, and ON Semiconductor (NASDAQ: ON). The chip embedded with AfterMaster technology is a groundbreaking audio solution that will dramatically enhance the listening experience on any consumer device.

The Aftermaster Pro—a device smaller than an iPhone—solves a widespread problem with TV audio. Prior to the arrival of the Aftermaster Pro, while watching TV, viewers would often need to turn up volume vigorously in order to clearly hear dialogue, or conversely turn down volume when loud special effects occur.

The Aftermaster Pro masters and re-masters inconsistent sound in real-time, making it not only

seamless, but more exciting and balanced than ever before. It creates an audio experience that stands light years ahead of anything on the market today.

The company expects to manufacture up to 50,000 units by the end of the year. The first phase will fulfill thousands of units that were pre-sold through crowdfunding to buyers in dozens of countries worldwide, totaling over \$750,000. Thereafter, units will be sold through select retail and online outlets. Aftermaster Pro is proudly manufactured in the USA and will retail for \$169.00.

Aftermaster, Inc. previously announced:

"We have worked for over six years to perfect AfterMaster's technology, with the goal of truly redefining the sound experience for everyone," says Larry Ryckman, Co-Founder and CEO of AfterMaster. "We are proud to announce Justin Timberlake as an owner—he is someone who truly understands audio and will be a key part of our team as we introduce our AfterMaster technology to the world."

"I'm thrilled to be a part of this groundbreaking company," says Justin Timberlake. "The first time I heard audio, post AfterMaster, I knew that I had to be a part of this company and that we had something revolutionary on our hands."

About Aftermaster, Inc. (OTCQB: AFTM):

Aftermaster is a groundbreaking audio technology originally developed for the mastering, re-mastering and processing of audio through Aftermaster HD Audio Labs, Inc. Aftermaster's executive team includes music and audio technology leaders Justin Timberlake, Rodney "Darkchild" Jerkins, Pete Doell, Andrew Wuepper, Shelly Yakus and Larry Ryckman.

Aftermaster delivers an unparalleled clarity, depth and fullness to audio recordings, while delivering a significant increase in volume without increased distortion or loss of dynamic range. The technology has been utilized by a number of leading musicians seeking to create a fuller and richer sound quality than otherwise available in digital audio.

About EmergingGrowth.com

EmergingGrowth.com is a leading independent small cap media portal with an extensive history of providing unparalleled content for the Emerging Growth markets and companies. Through its evolution, EmergingGrowth.com found a niche in identifying companies that can be overlooked by the markets due to, among other reasons, trading price or market capitalization. We look for strong management, innovation, strategy, execution, and the overall potential for long-term growth. Aside from being a trusted resource for the Emerging Growth info-seekers, we are well known for discovering undervalued companies and bringing them to the attention of the investment community. Through our parent Company, we also have the ability to facilitate road shows to present your products and services to the most influential investment banks in the space.
