

Baby Food and Infant Formula Global Market Segmentation and Major Players Analysis and Forecast to 2021

Baby Food and Infant Formula Market (Material, Production, Geography) 2016 Analysis and Forecast to 2021

PUNE, INDIA, October 4, 2016

/EINPresswire.com/ -- Baby food is any soft, easily consumed food, other than breastmilk or infant formula, which is made specifically for babies. The food comes in multiple varieties and tastes. Most infant formula is made with cow's milk, but it has been modified and supplemented with additional nutrients. As a result, the formula is more nutritious and easier for the baby to digest than cow's milk. Other formula options include soy-based formulas and hypoallergenic (or protein hydrolysate and amino acid-based) formulas.
