

Ericson Brings Power & Efficiency with New High Output LED Baylite for Temporary Lighting

Ericson, engineering and manufacturing of temporary power and lighting products, announces a new product launch for LED Baylite, product number 1004-LED.

WILLOUGHBY, OHIO, USA, October 4, 2016 /EINPresswire.com/ -- Ericson, engineering and manufacturing of temporary power and [temporary lighting](#) products, announces a new product launch for [LED Baylite](#), product number 1004-LED.

Ericson introduces the new LED Baylite (1004-LED) which provides immediate full intensity light output eliminating the warm-up period common with metal halide technology. The 150 Watt Baylite features include 15,000 Lumens of white light and 50,000 hour lamp life expectancy. The Baylite is UL Listed, wet location rated, and dimmable. Product information is now available. This LED Baylite will offer tremendous

Ericson Manufacturing LED Baylite for Temporary Lighting

benefit during start-up or in the event of power loss for any temporary job site or permanent lighting installation. With significant energy savings, it will provide a lower environmental footprint with a reduced operating cost. The 1004-LED Baylite reduces tension and glare on the eyes providing employees with the optimum environment to safely and efficiently complete tasks without compromise.

Specifications include:

In addition, the LED Baylite will offer accessories such as a 3/8" Stainless Steel Quick Hook, a Conduit Termination Box for permanent installation, and plug configuration options to suit a variety of installation needs.
