EDA tools are used in the designing of electronic systems. The range of products where these tools can be used is extremely wide as it can vary for the chips that are used in computers or mobile devices and satellites. An MCM is usually an electronic assembly where multiple integrated circuits (ICs), semiconductor dies, and other discrete components are integrated, generally on a unifying substrate, so that all the components can function as a single component. [EDA for PCB and MCM](#) is a set of software tools that are required to design complex electronic system circuits on PCB and MCM.

Research analysts forecast the global electronic design automation (EDA) for PCB and MCM market to grow at a CAGR of 3.27% during the period 2016-2020.

Covered in this report

The report covers the present scenario and the growth prospects of the global electronic design automation (EDA) for PCB and MCM market for 2016-2020. To calculate the market size, the report considers the revenue generated from software licenses.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Global Electronic Design Automation (EDA) for PCB and MCM Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Synopsys
- Cadence Design Systems
- Mentor Graphics

Other prominent vendors

- Altium Limited
- ANSYS
- Fujitsu
- Infinite Graphics Incorporated
- NEC
- Orbotech
- Zuken
