

Aircraft Ejection Seats Market 2016 Analysis and Forecast to 2020

Analysts forecast the global aircraft ejection seats market to grow at a CAGR of 4.42% during the period 2016-2020.

PUNE, INDIA, October 12, 2016 /EINPresswire.com/ -- [Global Aircraft Ejection Seats Industry](#)

Analysts forecast the global aircraft ejection seats market to grow at a CAGR of 4.42% during the period 2016-2020.

The need for safety systems has been an integral aspect since the advent of flights. They ensure the safe escape of pilots from any malfunctioning or damaged aircraft. The conventional escape systems consisted of only a recovery parachute. During the Second World War, the aircraft performances rapidly increased, which necessitated the escape systems for the crew to be equally fast. This led to the development of ejector seats. The traditional ejection seats were powered by a propellant-driven catapult.
