

3D Display Industry Global Analysis Grow At CAGR 28.38% 2016 to 2020

Analysts forecast the global 3D display market to grow at a CAGR of 28.38% during the period 2016-2020.

PUNE, INDIA, October 12, 2016 /EINPresswire.com/ -- [Global 3D Display Industry](#)

Analysts forecast the global 3D display market to grow at a CAGR of 28.38% during the period 2016-2020. 3D displays exhibit images with depth perception by using various technologies such as multi-view, stereoscopic, and 2D-plus-depth displays. However, to experience depth perception, special 3D glasses are required to view the images from 3D displays. Some display technologies that do not need special glasses include an active shutter 3D system and a polarized 3D system (or autostereoscopic system). 3D displays are used in various devices such as 3D TVs, mobile handsets, tablets, gaming devices, and HMDs.

Covered in this report

The report covers the present scenario and the growth prospects of the global 3D display market for 2016-2020. To calculate the market size, the report considers the total sales of 3D displays {used in devices, including TVs, smartphones, and HMDs [both augmented reality (AR) and virtual reality (VR) HMDs that use 3D microdisplays]} worldwide. 3D display technologies including light-emitting diode (LED), organic LED (OLED), and others [plasma display panel (PDP) and digital light processing (DLP)] are considered to calculate the market size in the report.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Global 3D Display Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- LG Display
- Panasonic
- Samsung Display
- Toshiba
- AU Optronics
