OTT or over-the-top refers to a medium used for delivering diverse media content using the Internet. It is different from video-on-demand where the users need not subscribe to the traditional satellite or cable service such as Comcast and Time Warner Cable. The popularity of OTT services is indirectly affecting the cable companies that prefer to bundle the channel packages and deliver them to the subscribers. It is further affecting their business models where the popular channels are bundled with the less popular channels and are sold at a premium price.

Research analysts forecast the global OTT devices and services market to grow at a CAGR of 20.6% during the period 2016-2020.
