

Global Aerospace Oxygen Systems Market Likely to Grow at 5.5% CAGR During 2016 to 2021, as per Stratview Research

An Extensive Market Research Report from Stratview Research includes Trends, Forecasts, Competitive Analysis and Strategic Growth Opportunities.

DETROIT, MI, USA, October 14, 2016 /EINPresswire.com/ -- Stratview

Research announces the addition of a new market research report on [Global Aerospace Oxygen Systems Market](#) by Aircraft Type (Narrow Body Aircraft, Wide Body Aircraft, Very Large Aircraft, Regional Aircraft, and General Aviation), by System Type (Passenger Oxygen System and Crew Oxygen System), by Component (Storage System, Delivery System, and Mask), by Mechanism (Chemical and Compressed), and by Region (North America, Europe, Asia-Pacific, and Rest of the World), Trend, Forecast, Competitive Analysis, and Growth Opportunity: 2016-2021

This market report from Stratview Research studies the aerospace oxygen systems market over the period 2010 to 2021. The research report provides detailed insights on the market dynamics to enable informed business decision making and growth strategy formulation based on the opportunities present in the market.

The Global Aerospace Oxygen Systems Market: Highlights

Stratview Research foresees a healthy growth of 5.5% CAGR in the aerospace oxygen systems market over the next five years (2016 – 2021), which offers an opportunity to the aerospace industry players to align themselves with the market growth.

There are number of factors bolstering the growth of aerospace oxygen systems market. The author of the report cited that increasing commercial and regional aircraft deliveries, high growth of wide body aircraft, and growing aircraft fleet size are the key drivers of the global aerospace oxygen systems market.

Passenger oxygen system is expected to remain the largest segment during the forecast period. Requirement for higher number of passenger oxygen systems in an aircraft cabin than crew oxygen systems and higher replacement rate are the major drivers for the passenger oxygen systems market. In terms of mechanism type, chemical oxygen system is expected to exhibit the fastest growth during the forecast period. Chemical oxygen system generally comprises of sodium chromate (NaClO_3) along with smaller amounts of other chemicals and converts these chemicals into oxygen flow when

the source is activated.

North America is expected to remain the largest market for aerospace oxygen systems during the forecast period. Manufacturing base of Boeing and Bombardier aircraft in the US & Canada and increasing commercial, regional, and general aviation fleet size are some of the major drivers of North American dominance in the global aerospace oxygen systems market.

The global aerospace oxygen systems market is a highly consolidated with few large players dominating the market. The key oxygen system manufacturers are C&D Zodiac, B/E Aerospace, Air Liquide, Cobham Plc, Ventura Aerospace, and Technodinamika Holding.

New product development, such as lightweight oxygen systems, long term contracts, and collaboration with customers are the key strategies adopted by the key players to gain competitive edge in the market.

Report Features

This industry research report from Stratview Research provides market intelligence in the most comprehensive manner. The report structure has been kept such that it offers maximum business value. It provides critical insights on the market dynamics and will enable strategic decision making for the existing market players as well as those willing to enter the market. The following are the key features of the research report:

- Market structure: Overview, industry life cycle analysis, supply chain analysis.
- Market environment analysis: Growth drivers and constraints, Porter's five forces analysis, SWOT analysis.
- Market trend and forecast analysis.
- Market segment trend and forecast.
- Competitive landscape and dynamics: Market share, product portfolio, product launches, etc.
- Attractive market segments and associated growth opportunities.
- Emerging trends.
- Strategic growth opportunities for the existing and new players.
- Key success factors.

Stratview Research has a number of high value market reports in the global aerospace & defense industry. Please refer to the following link to browse through our reports:

About Stratview Research

Stratview Research is a global market intelligence firm providing wide range of services including syndicated market reports, custom research and sourcing intelligence across industries, such as Advanced Materials, Aerospace & Defense, Automotive & Mass Transportation, Composites, Consumer Goods, Construction & Equipment, Electronics and Semiconductors, Energy & Utility, Healthcare & Life Sciences, and Oil & Gas.

We have a strong team of industry veterans and analysts with an extensive experience in executing custom research projects for mid-sized to Fortune 500 companies, in the areas of Market Assessment, Opportunity Screening, Competitive Intelligence, Due Diligence, Target Screening, Market Entry Strategy, Go to Market Strategy, and Voice of Customer studies.

Stratview Research is a trusted brand globally, providing high quality research and strategic insights that help companies worldwide in effective decision making.
