The report provides detailed insights on the market dynamics to enable informed business decision making and growth strategy formulation based on the opportunities present in the market.

## The Global Automotive Keyless Entry Systems Market: Highlights

The global automotive keyless entry systems market offers a robust growth opportunity of 6.8% CAGR during the forecast period of 2016 to 2021.

There are a number of factors bolstering the growth of keyless entry systems in the global automotive industry. The author of the report cited increasing automotive production, stringent vehicle theft prevention regulations, focus on high comfort and convenience, and demand for high security vehicles as the major drivers of the global keyless entry systems market.

Remote keyless entry system (RKE) is the dominant entry system worldwide and offers optimum solutions to all the low cost auto vehicles. Passive keyless entry system (PKE) is likely to witness the fastest growth during the forecast period as it offers higher convenience and better security to the vehicle than traditional remote keyless entry system.

The research report suggests that passenger car segment is expected to remain the largest market for keyless entry systems during the forecast period. High demand for better comfort and security vehicles and increasing car production will continue to drive the demand of the keyless entry systems in the passenger car segment.
