

Boston IT Solutions reveals ground-breaking technologies

Boston IT Solutions are pleased to announce end-to-end solutions for the serious media companies visiting this year's popular event at Broadcast India.

MUMBAI, MAHARASHTRA, INDIA, October 20, 2016 /EINPresswire.com/ -- Recognising the industry's move to cloud environments for digital content creation, creative artists, rendering and content delivery, Boston will showcase the [vScaler](#) platform which can orchestrate, manage and deploy ultra-dense yet scalable and high performance software defined infrastructure enabling on-premise, off-premise and hybrid cloud platforms.

Boston will also be showing on-premise local solutions like their Venom 2501-0P workstation. This system features the latest innovations from graphics stalwarts NVIDIA® with the Quadro™ P5000 GPU, built on the latest Pascal™ architecture. Whilst the Venom 2501-0P is a physical workstation product, Boston also

provides workstations in the cloud, using vScaler, and other products that will be on live demo at Broadcast India.

The 1U form factor [Boston Roamer 1100-0](#) is the leading NVIDIA® GRID™ 3.0 platform incorporating NVIDIA®'s M60 GPU's and can be implemented as a standalone deployment or can be installed and managed by vScaler, making systems' administration a breeze with its well designed user interface.

Boston will be pushing the boundaries of processing technology with the Supermicro® 5038K-I "Knights Landing" developer platform. This features up to 72 cores in a workstation-like pedestal system and acts a pre-cursor to production environments that can be found in the ubiquitous 2U, 4-node Quattro platform from Boston. The Quattro 12256-T system, based on Supermicro® technology, features four nodes supporting up to 72 cores per node and 384GB of DDR4 DRAM. This system may be utilised for ray tracing, machine learning and a raft of other complex processing workloads.

Mr. Manoj Nayee, Managing Director of the Boston group, comments:

"It is exciting to reveal both ground breaking new technologies and evolutions of successful product lines at this year's Broadcast India event. The broadcast, film and media & entertainment industry is constantly evolving and we feel that our solutions, innovations and services can truly assist the growth
