

Organic Food and Beverage Global Market Analysis 2016 and Forecast 2022

Organic foods are the edible products manufactured with the help of organic farming. The organic food farming is an integration of site specific farming.

PUNE, INDIA, October 20, 2016 /EINPresswire.com/ -- Organic Food and Beverage

Summary

Organic foods are the edible products manufactured with the help of organic farming. The organic food farming is an integration of site specific farming that depend biological and mechanical practices and crop cultivating conditions. The organic farming is currently conducted in more than 160 countries that shared approximately 0.86% of total farming area in 2012. The favorable government policies are responsible for the growth of the organic food and beverages market.

The initiative taken by private and public funded companies are fueling the growth for this market. In 2012, organic food had shared approximately 80% of total food market. Increase in health care awareness is responsible for the increase in consumption of healthy food and beverage, which is also spurring the growth of the market.

According to FDA, there were approximately 20,000 different types of organic food and beverages available in United States. These 20,000 organic food products account for approximately 73% of total conventional food grocery stores. The shorter shelf life of organic food products is acting as major barrier for the growth of organic food market. The perishable organic food products get spoiled due to inefficient logistic service which is impacting the growth of this market. In addition, the higher price of raw materials used in the cultivation of organic farming is also curbing the growth of this market. The undeveloped infrastructure for food storage and logistics is also curbing the organic food and beverages market. The organic food market is facing challenges due to the lack of efficient logistic and high cost of raw materials. These factors contribute to an increase in the price of the products. However, success in novel product launch and increase in packaging efficiency are expected to resolve these challenges. This report provides an in depth intelligence of the key developmental strategies adopted by the companies engaged in this industry.
