PUNE, INDIA, October 24, 2016 /EINPresswire.com/ -- [Global Aviation Actuation Systems Market](#)

Actuation systems control a broad range of applications in an aircraft. Almost every movable part in an aircraft is comprised of an actuator; for example, actuators extend and retract landing gears. They are also used to monitor and control velocity and engine speed by adjusting levers and flaps. Different sources of energy such as electricity, hydraulic fluid pressure, or pneumatic pressure that convert energy into motion are used to operate actuation systems.
