Industrial robotics refers to the use of robots in the manufacturing and assembly processes in the automotive, heavy industries, and electronics industries. Industrial robots are programmed to automate and control manufacturing processes such as welding, painting, assembly, product inspection, testing, and packaging.

There are several types of industrial robots, such as articulated robots, Cartesian robots, SCARA robots, and cylindrical robots. These robots are used in the heavy machinery industry for different purposes, including welding and soldering, handling of materials and processing, assembling and disassembling, dispensing and painting, cutting, milling, and other processes.

Research analysts forecast the global industrial robotics market in the heavy industry to grow at a CAGR of 6.19% during the period 2016-2020.

Covered in this report

The report covers the present scenario and the growth prospects of the global industrial robotics market in heavy industries for 2016-2020. The global robotics market is classified into industrial robots and service robots. This report considers revenue generated from the heavy industries segment.

The market is divided into the following segments based on geography:

- APAC
- Americas
- EMEA

Global Industrial Robotics Market in Heavy Industries 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key Vendors

- ABB
- Fanuc
- KUKA
- Yaskawa

Other Prominent Vendors

- Adept Technology
- Apex Automation and Robotics
- Denso Robotics
- Epson Robotics
- Kawasaki Robotics
- Mitsubishi Electric

- Nachi Robotic Systems
- Rethink Robotics
- TM Robotics
- Universal Robots
