PUNE, INDIA, October 24, 2016 /EINPresswire.com/ -- [Global Cloud Backup and Recovery Software Market](#)

Cloud or online backup is a method of backing up data that involves sending copies of the data over a public cloud. The server is usually hosted by a third-party service provider that charges the customer a fee based on bandwidth, capacity, number of users, and backup.

Cloud backup and recovery solutions securely copy the files to many servers. These solutions are safe from hard drive failures that are common with PCs. The files are also encrypted so that no one other than the user can view them, protecting the data from viruses and hackers. As well, cloud backup and recovery solutions allow fast and easy access to all backed-up files.
