Scientific instruments are crucial components that are used in measuring, analyzing, and verifying the unproven quantities and properties of an element or a material. Most of the scientific instruments are integrated with computers to improve their functionality and features. Parameter adjustments, data sampling, collection, resolution, analysis, storage, retrieval, and other functionalities of scientific instruments can be enhanced by integrating them with computers. A laboratory information management system (LIMS) can be formed by connecting individual scientific instruments in a local area network (LAN). Research institutions use scientific instruments to achieve optimum efficiency in their research processes. Scientific instruments are also a part of manufacturing processes and new product development to remodel and innovate existing products.

Research analysts forecast the global scientific instrument market to grow at a CAGR of 4.25% over the period 2014-2019.

Covered in this report

The report covers the present scenario and the growth prospects of the global scientific instrument market for 2015-2019. The report offers the segmentation of the market based on the following: end-user, application, and geography.

Global Scientific Instrument Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the Americas, APAC, and EMEA; it also covers the landscape of the global scientific instrument market and its growth prospects in the coming years. The report includes a discussion of the key vendors operating in this market.

Key regions

- Americas
- APAC
- EMEA

Key Vendors

- Agilent Technologies
- Bruker
- Danaher
- Horiba
- Thermo Fisher Scientific

Other prominent vendors

- Merck
- Pelkin Elmer

- Roche Diagnostics
- Waters
