

Ed-Tech Company Paperscorer Adds Features that Scan, Auto-Grade Paper Answer Sheets

Paperscorer, a company that builds apps and software for teachers, announces new features that scan, upload and auto grade paper answer sheets in bulk.

FARMINGTON HILLS, MI, UNITED STATES, October 25, 2016 /EINPresswire.com/ -- [Paperscorer](http://www.paperscorer.com) - a company that develops apps and software for teachers - today launched the ability for its customers to scan and upload answer forms in bulk for automatic grading. Paperscorer's technology automatically grades each form and imports the results to either [Google Classroom](https://classroom.google.com/) or [Instructure Canvas](https://lms.canvaslms.com/) LMS accounts. Paperscorer also provides an app for educators or students to auto-score assessments using mobile devices.

"There are still many valid reasons to have students take assessments offline," says Chris Morgan, the Founder and Managing Partner of Paperscorer. "In some situations, a digital device may be considered a distraction to the assessment. Not all students have access to digital devices. Many teachers are under pressure to use technology, but struggle to change their practices completely. That said, the convenience of auto-grading and the advanced capabilities of grade analysis with technology are something most teachers want. Paperscorer aims to bridge this gap."
