

Levenhuk introduces LabZZ optics for kids and teenagers

Levenhuk LabZZ optical products are designed especially for the youngest users. They have compact dimensions, light weight, and are very easy to use.

CALIFORNIA, USA, October 27, 2016 /EINPresswire.com/ -- LabZZ instruments are unusual and bright modern telescopes, microscopes, [binoculars](#), science kits and optical accessories. All LabZZ products are very easy and safe to use, but they provide children with wide research abilities and come with a large number of additional accessories. LabZZ devices are packed in colorful, eye-catching gift boxes. And a most important consideration for children's devices – they are safe.

It's so easy to take your first steps in astronomy with Levenhuk LabZZ Telescopes! They are perfect choice for a beginning amateur astronomer or a child interested in exploring the Cosmos. Levenhuk LabZZ Microscopes are designed for young explorers of the microcosm. With these microscopes young scientists will take their first steps in science. The supplied kit includes everything needed for this purpose: easy-to-use [microscope](#), prepared microscope slides, and special tools for working with microscope samples. Kids can manage the instrument independently and explore amazing structures of everyday things. Levenhuk LabZZ MTB3 Kit is an ideal gift for an inquisitive child. The kit includes three optical instruments – microscope, [telescope](#) and binoculars. All three are designed to meet the needs of young observers, while their capabilities are similar to those of "grown-up" models. The kit helps a child dive into all the wonders and mysteries of the world around us – your kid can study the microcosm,

into all the wonders and mysteries of the world around us – your kid can study the microcosm,

explore space and discover the captivating world of wildlife.
