

Global Airport Lighting Market Poised to Grow at 7.6% CAGR During 2016 to 2021, Says Stratview Research

Extensive Market Research Report from Stratview Research Includes Trends, Forecasts, Competitive Analysis and Strategic Growth Opportunities.

DETROIT, MI, USA, October 28, 2016 /EINPresswire.com/ -- Stratview Research announces the addition of a new market research report on Global Airport Lighting Market by Airport Type (Commercial and Military), by Light Type (Runway Lighting, Taxiway Lighting, Approach Lighting, Apron & Hanger Lighting, Obstruction Lighting, and Others), by Position (In-Pavement/Inset Lights, Elevated Lights, and Precision Approach Path Indicator), by Technology (LED and Non-LED), by Region (NA, Europe, APAC, ROW), Trend, Forecast,

Competitive Analysis, and Growth Opportunity: 2016 – 2021.

This market report from Stratview Research studies the airport lighting market over the period 2010 to 2021. The research report provides detailed insights on the market dynamics to enable informed business decision making and growth strategy formulation based on the opportunities present in the market.

The Global Airport Lighting Market: Highlights

Stratview Research foresees a robust growth of 7.6% CAGR in the airport lighting market over the next five years (2016 – 2021), which offers an opportunity to the lighting and electrical industry players to align themselves with the market growth.

There are several factors bolstering the growth of lighting in the global airport infrastructure industry. The author of the report cited increasing government investment on airport infrastructure driven by increasing passenger traffic and rising disposable income, increasing focus on energy efficient lighting systems, and lower operational & maintenance costs as some of the key growth drivers of the global airport lighting market.

Commercial airport segment is expected to remain the growth engine of the airport lighting market during the forecast period.

Runway lighting system is expected to remain the largest lighting type during the forecast period whereas, apron & hanger lighting system is also expected to experience fastest growth during the same period.

In terms of technology type, LED lights are expected to witness the highest growth during the forecast

period, driven by increasing focus on energy efficiency and reduction in overall operation and maintenance cost of the airport.

North America is expected to remain the largest lighting market for airport applications during the forecast period due to the presence of large number of commercial and military airports and high focus towards energy efficiency and low operational cost. Asia Pacific is expected to grow at the highest rate in the next five years.

Report Features

This industry research report from Stratview Research provides market intelligence in the most comprehensive manner. The report structure has been kept such that it offers maximum business value. It provides critical insights on the market dynamics and will enable strategic decision making for the existing market players as well as those willing to enter the market. The following are the key features of the research report:

- Market structure: Overview, industry life cycle analysis, supply chain analysis.
- Market environment analysis: Growth drivers and constraints, Porter's five forces analysis, SWOT analysis.
- Market trend and forecast analysis.
- Market segment trend and forecast.
- Competitive landscape and dynamics: Market share, product portfolio, product launches, etc.
- Attractive market segments and associated growth opportunities.
- Emerging trends.
- Strategic growth opportunities for the existing and new players.
- Key success factors.

Stratview Research has a number of high value market reports in the global aerospace & defense industry. Please refer to the following link to browse through our reports:
