

Ensil Significantly Expands Patent Portfolio

Ensil again is demonstrating its ongoing commitment to innovation and leadership in the design and manufacturing of innovative product lines.

MARKHAM, ONTARIO, CANADA,
November 1, 2016 /EINPresswire.com/ --

“From the beginning, we recognized the importance of developing and then protecting our technology,” said Iain McOnie, P.Eng, MBA, Ensil's Vice President of Major contract. “As a pioneer in design of electronics circuits used in various lines of products such as defence, aerospace, medical, telecommunication and industrial robotics, we know our design and innovations are indeed a game changer for our clients worldwide. To have our creativity recognized by patent offices around the globe (United States, Canada, Europe, Japan, Australia and others) is a source of pride for the entire Ensil team and should be very comforting to our team of engineers and scientists, Customers, Partners and vendors.”

“

Our design and innovations are a game changer for our clients worldwide. To have our creativity recognized is a source of pride for us and should be very comforting to our Customers and Partners.”

Iain McOnie, P.Eng, MBA

“By hiring and adding many recent professional engineers and scientists with P.Eng designations and some with Phd. degrees to Ensil's design and engineering team, we anticipate to apply for many more design patents in the coming months and Ensil is looking forward to what innovative and trend setting product line it can design next and how it can partner with our stakeholders by creating solutions for the challenges that our Customers are facing today and likely will face in the future.” said Iain McOnie, P.Eng, MBA, Ensil's Vice President of Major contract.
