

# Over 92% Patients with Chronic Prostatitis Get Radical Cures by TCM Medicine Diuretic and Anti-inflammatory Pill

*Naturopathic medicine-Diuretic and Anti-inflammatory Pill brings new hope to prostatitis and CPPS men with a safe, natural and effective treatment.*

NEW YORK, NEW YORK, AMERICA, November 1, 2016 /EINPresswire.com/ -- When antibiotics seem not effective and bring many side effects on our bodies, more and more patients are searching for alternative medical approaches, like [Diuretic and Anti-inflammatory Pill](#). Over 92% patients with chronic [prostatitis](#) or CPPS proved to have a radical cure with this herbal medicine.

On August 30, 2006, WHO releases new treatment guidelines to deal with the growing drug resistance of antibiotics. Also, on September 21, 2016, the U.N. General Assembly devotes an entire day to the issue of superbugs and antibiotic resistance. At the same time, many patients blame antibiotics has become more and more difficult to treat their diseases. Except that, more evidences show that side effects of antibiotics outweigh its advantages.

Mr. W was from Canada, and he was diagnosed with chronic prostatitis in 2010. He lived with the disease for over a year, getting no effective treatment. He found herbal treatment of chronic prostatitis on Google and contacted Dr. Lee. At first he wasn't quite confident in this completely unfamiliar treatment, so he just ordered one month of pills to "have a try".

"When I finished first month of treatment, I found some of my symptoms got reduced, such as, ED (erectile dysfunction) is much released, but the pain in lower back still existed. And I have seen the improvements, so I'd like to continue the treatment. Then, after the next medication, I found ED is no longer a problem, and the pain in my lower back is quite slight. Then I took a test in the hospital, I was told that the prostate was no longer congestive, and was in a good size.

When all the inflammation is eliminated, and there is no pain remained, Mr. W is suggested to take another month medication to cut any possible cause of prostatitis to prevent from recurrence. He said "that's what I'm thinking about". <http://prostatitisradicalcure.com/a/Testimonials/>

"Growing antibiotic resistance and side effects have reduced treatment options of chronic prostatitis. Since doctors need to search new ways to treat it and herbal medicine Diuretic and Anti-inflammatory Pill could be the best choice to replace antibiotics in the chronic prostatitis and CPPS treatment." Dr. Lee Xiaoping, the doctor of Wuhan Dr. Lee [TCM](#) Clinic says. Dr. Lee is a highly experienced medical professional, and specializes in the field of male and female reproductive and urinary system diseases.

Qualified as the herbalist 30 years, Dr. Lee adds that, "In TCM theory, many symptoms of chronic prostatitis and CPPS are caused by infection or inflammation, and result in the blood congestion in lesion parts. And the herbs in Diuretic and Anti-inflammatory Pill work well to clear away heat and toxic material, dissipate hard lumps, dissolve stasis and release pain. What's more, herbal treatment could also avoid some shortages that caused by antibiotics, as damages to liver and kidney, as well

as drug resistance or tolerance, which is evidence as a natural and safe way to cure chronic prostatitis and CPPS.” Read more about the theories on curing this disease:

[http://www.diureticpill.com/Medical\\_Use/Prostatitis/20150826/730.html](http://www.diureticpill.com/Medical_Use/Prostatitis/20150826/730.html)

Except that, many patients live with chronic prostatitis for a long time, and at the same time, they also suffer many other reproductive complications like epididymitis, seminal vesiculitis, orchitis, and even have male infertility problems like necrospemia, azoospermia, etc. While Dr. Lee recommends that herbal medicine Diuretic and Anti-inflammatory Pill could answer this problem. Because traditional Chinese theory holds that a scientific dosage of herbs could not only cure chronic prostatitis and CPPS, but also give significant effects on related male and female reproductive diseases. And from the view of TCM, the ideal treatment takes to cure the disease as a whole, not merely the symptoms, but also the cause; not merely the disease, but also nurture human body. Only this way, patients could get a complete cure, and won't recur.

According to the patients' clinical symptoms, heat-clearing and detoxifying herbal medicine Diuretic and Anti-inflammatory Pill provides the significant effects to kill bacterial, promote blood circulation, remove blood stasis, induce diuresis and treat stranguria method, reaching the effect of symptoms disappearing, reproductive or urinary organs back to normal.
