

Documentation toolkits reduce costs by streamlining ISMS implementation, says IT Governance

WYOMING, UNITED STATES, November 2, 2016 / EINPresswire.com/ -- IT Governance, the leading provider of information security expertise and solutions, is encouraging everyone involved in information security management system (ISMS) implementation projects to take advantage of the [ISO 27001 ISMS Documentation Toolkit](#) to reduce costs and time spent.

Alan Calder, the founder and chief executive officer of IT Governance, said: "The standard for information security management systems, ISO 27001, requires organisations to prove their conformance to the Standard through policies and procedures, which can be a lengthy process of creating thousands of pages of documentation for large organisations."

The ISO 27001 ISMS Documentation Toolkit is designed and developed by ISO 27001 practitioners. The toolkit provides all the information security management system (ISMS) documentation necessary to comply with ISO 27001.

"Recent research shows that it can take over 12 months to achieve certification to ISO 27001 ISMS because every policy and procedure needs to be researched, developed, approved and deployed. Using documentation toolkits can significantly reduce the time and cost of implementing and achieving certification to standards such as ISO 27001, as well as minimising the possibility of error."

The ISO 27001 ISMS Documentation Toolkit includes a quick-start guide to help implementation teams get in-depth understanding of its functionality and get started implementing the ISMS. It contains project tools such as an ISO 27001:2013 gap analysis tool, an ISO 27001:2013 controls gap analysis tool, an ISO 27001 implementation manager, an ISO 27001:2013 documentation structure and dashboard, as well as ISO 27001 documents and controls requirements.

The toolkit also provides unique features such as single-input customisation, which allows implementation teams to own the project and focus on reflecting the organisation's environment. The toolkit also integrates with [vsRisk](#), the risk assessment tool, which provides control documentation relevant to the organisation's risks.

Information security and compliance professionals can get an in-depth understanding of the benefits IT Governance's documentation toolkits bring by downloading a free trial of the ISO 27001 ISMS Documentation Toolkit.
