

Dillistone Announces Industry First - FileFinder Integration with Native Outlook on Apple Macs

LONDON, UNITED KINGDOM, November 3, 2016 /EINPresswire.com/ -- In a first for the recruitment software industry, Dillistone Systems, the global provider of the market leading FileFinder Anywhere suite of Executive Search applications, has announced that the product range now supports integration with the native Apple Mac version of Microsoft's Outlook email app.

The new development allows users on the Mac operating system to add information to and review information from the FileFinder database from within the native version of Outlook.

Several firms provide similar functionality for the Windows version of Outlook, and Dillistone has long provided a comparable service within the Browser version of Microsoft's market-leading email app, but this is believed to be the first time that Outlook users on Macs will enjoy access to such functionality within the native version of the tool.

“

Our ethos is to allow our users to work anywhere, anytime. Search is not a 9-5 industry and our clients need apps that support them everywhere and anywhere. FileFinder Anywhere does exactly that.”

Jason Starr, Managing Director of Dillistone Systems

our users to work anywhere, anytime. How many of our clients have team members who use Macs at home? Search is not a 9-5 industry and our clients need apps that support them everywhere and anywhere. FileFinder Anywhere does exactly that.”

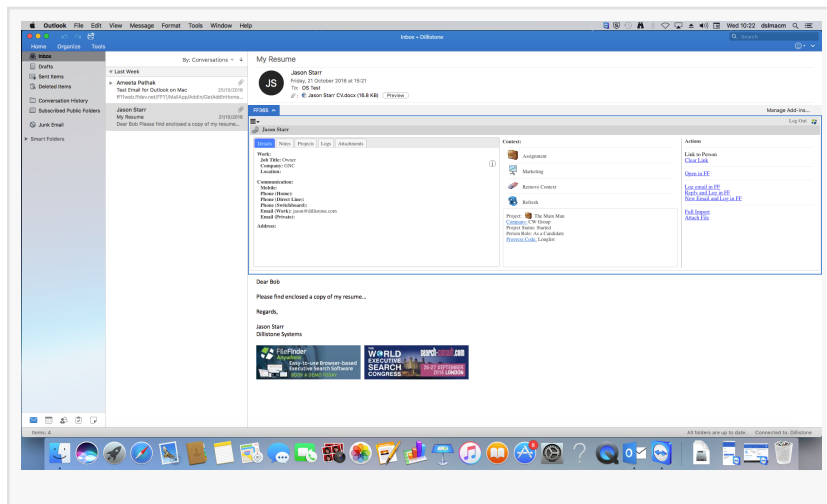

Dillistone Systems has enjoyed a dramatic increase in sales growth for the FileFinder Anywhere App in 2016 and the latest developments – which come just a month after the launch of the FileFinder Anywhere client portal – will further that growth.

“As the only mainstream supplier to executive search with a full browser solution, we can now focus our efforts on continuing to further improve the experience of our users with tools like this. We expect further announcements in the coming months,” added Jason Starr.
