## Key Findings

- What was the size of the India renewable energy market by value in 2015?
- What will be the size of the India renewable energy market in 2020?
- What factors are affecting the strength of competition in the India renewable energy market?
- How has the market performed over the last five years?
- Who are the top competitors in India's renewable energy market?

## Synopsis

Essential resource for top-line data and analysis covering the India renewable energy market. Includes market size and segmentation data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

## Reasons to Buy

- Save time carrying out entry-level research by identifying the size, growth, major segments, and

leading players in the renewable energy market in India

- Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the renewable energy market in India
- Leading company profiles reveal details of key renewable energy market players' global operations and financial performance
- Add weight to presentations and pitches by understanding the future growth prospects of the India renewable energy market with five year forecasts by both value and volume

### Key Highlights

The renewable energy market consists of the net generation of electricity through renewable sources. It is divided into five segments, these being hydroelectricity; wind energy; solar, tide and wave energy; electricity generated through biomass and waste; and geothermal energy. The volume of the market is calculated as the net volume of electricity produced through renewable means in terawatt hours (TWh), and the market value has been calculated according to an average of annual domestic and industrial retail prices per kWh, inclusive of applicable taxes. Any currency conversions used in the creation of this report have been calculated using constant 2015 annual average exchange rates. Please note that 1 terawatt hour is identical to 1,000 gigawatt hours (GWh).

The Indian renewable energy market had total revenues of \$15.7bn in 2015, representing a compound annual growth rate (CAGR) of 6.5% between 2011 and 2015.

Market production volume increased with a CAGR of 2.3% between 2011 and 2015, to reach a total of 189.5 TWh in 2015.

India's output from renewable slowed significantly to 0.6% growth in 2015. This was exacerbated by price declines of an average of -12.6% in 2015, pushing the overall value of the market into decline.

### Table of Contents

- Executive Summary
