

# Versatile 360H6 360 Video Rig from 360RIZE Offers Support for New GoPro™ Hero5 Black Camera

*The 360H6 weatherproof 360 video rig is one of the most versatile rigs available to content creators with added support for the new GoPro™ Hero5 Black.*

OLEAN, NY, UNITED STATES, November 4, 2016 /EINPresswire.com/ -- The 360H6 [weatherproof 360 video rig](#) is one of the most versatile rigs available to content creators. Mounting 6 GoPro™ cameras in their waterproof housings, the rig's simplistic design is compatible with new GoPro™ Hero5 Black, GoPro™ Hero4 series cameras and GoPro™ Hero3 series cameras.

Chris du Plessis filming with the 360H6 in South Africa

The 360H6's interchangeable design makes it possible to switch between different versions of GoPro™ cameras when they are in their waterproof housing. This adaptability has allowed users to take the 360H6 all over the world, filming in different environments with a variety of GoPro™ Hero4 and Hero3 cameras. This same concept now applies to the new GoPro™ Hero5 Black.

“

From the arctic to the rainforest, this weatherproof rig offers content creators versatility and captures high resolution (7,500 x 3,750 pixels) 360 video in the world's most remote, harsh conditions.”

*Michael Kintner, 360RIZE  
CEO*

Since the 360H6 attaches to GoPro™ cameras via their waterproof housings, the 360H6 can be attached to the GoPro™ Hero5 Black in the same fashion. 360RIZE's original setup video for the 360H6 demonstrates how cameras and their housings are fastened to the rig. This process is exactly the same for the GoPro™ Hero5 Black and can be applied to add support for these new cameras.

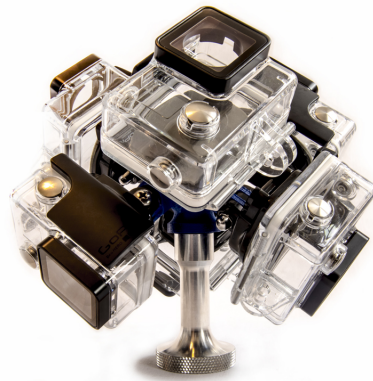

Added camera support now means this rig's capabilities have continued to expand as it now offers support for the GoPro™ Hero5 Black, GoPro™ Hero4 series cameras and GoPro™

Hero3 series cameras.

Its ability to protect cameras in rainy, misty conditions makes it a favorite among filmmakers capturing life at sea. Filming aboard boats, surfboards, and other aquatic craft are all popular uses for the 360H6 rig. The relatively light weight of the unit and its small form factor also make drone mounting, simple monopod mounting and tripod mounting in studios all possible. These different configurations make the 360H6 arguably the most versatile [360 video](#) rig on the market.

The 360H6 continues to be a key piece of the 360 shooter's toolkit as it adapts with updated camera support. For more information on adding Hero5 Black support to the 360H6 or the rig in general, contact [support@360rize.com](mailto:support@360rize.com).
