

New Smart Towel Lockers Reduce Towel Loss and Improve Towel Management Systems

Towel Lockers

NORTHBROOK, ILLINOIS, USA, November 8, 2016 /EINPresswire.com/ -- Smart towel lockers are the wave of the future. However, until now, there hasn't really been a smart [towel locker](#) design that facility managers and owners could depend on. Now, thanks to the ingenuity and technical savvy of engineers, there are smart towel lockers available which ensure that facility managers are able to monitor towel inventory, via high-tech, RFID technology.

Today, we'd like to share some information about these smart towel [locker](#) designs and all that they have to offer. Once you've discovered their many features, you'll be ready to decide if investing in them is right for your facility. These lockers are perfect choices for health clubs, hotel fitness centers, local swimming pools and any other establishments which provide [towels](#) to customers (which are meant to be returned after usage).

Key Benefits of These Towel Cabinets

These cabinets are equipped with RFID chips and they are able to calculate whether towels are in lockers or not, how many towels are in place (if towels are there) and transmit messages to a system when fresh towels are needed. This type of cabinet offers dual benefits. It helps to deter or stop towel theft and also gives facility managers cues to put new towels in the cabinets, which contributes to better customer service and happier customers.

Traditionally, customers really dislike having their bags searched for towels. They find this type of system offensive and the new smart locker system will allow facility managers to track towels and replace them, without bothering the patrons of their businesses or community centers.

Towel Theft Gets So Expensive

Towel theft is something that happens almost everywhere that towels are handed out for loan. Health clubs, local swimming pools, private gyms and hotel fitness centers (to name just some examples) are always dealing with towel theft and the problems that it creates. Without this new smart cabinet system, towel theft will always be a problem and it will cut into the profits of businesses.

This RFID-based system protects against towel theft and logs event. A database is designed which features customised data for classification and designations. As well, when alleged theft

occurs, staff will receive a cue which may be heard and seen. Readers for these systems are designed to provide performance even at long ranges. This means that it's possible to perform inventory remotely! As you can see, this type of towel locker system is just so beneficial. It's got all of the right features.

Is This System Right for You?

You deserve the best locker cabinet system around. When you choose innovative new towel lockers, you'll be on the cutting edge of technology and you'll have more control over what happens to towels at your facility. As well, you'll be primed to serve the needs of your valued customers or visitors in a more efficient, less invasive manner. Lastly, you'll find that this system stops towel theft and helps you to trim the cost of doing business at your facility. So, why not purchase one of these lockers today?
