

Worldcore Payment Institution Featured at EuroFinance 2016 Vienna

Speaking to 1,800 treasury professionals, Worldcore CMO explains how banks and fintechs partner for greater customer satisfaction

VIENNA, AUSTRIA, October 14, 2016 /EINPresswire.com/ -- VIENNA, Austria – October 14, 2016 – [Worldcore](#), the Czech-based payment institution was a featured presenter at the 25th Annual EuroFinance International Treasury & Cash Management conference. Featured on a panel with distinguished global bankers, Worldcore established itself as a leading innovator in the global payments space.

Speaking on behalf of Worldcore, CMO [Sean Patterson](#) argued that, “it is a myth to suggest that fintech is at war with banks. This is fallacious argumentation that lobbyists have cooked up to scare legislators into clamping down on the free enterprise values that PSD 2 and fintechs, in general, bring to the public. Worldcore works with banks to benefit customers. We view banks as enablers for our technology development.”

Patterson also explained that fintechs, “look to find spaces in the market that are ripe for improvement, then use the technology they develop to fill those holes. Staying innovative is what builds a stronger web of business and consumer services.”

“Long gone are the days of confusing payments,” says Patterson. “Today

Worldcore offers clients payments that are ‘easier than you think’ through an intuitive, but powerful, user experience that includes mass payouts, drag and drop APIs, and shopping cart integration all while offering competitive fee structures. Easy, secure, fast: these are what separates us from our competitors.”
