

Tableau Updates in Data Visualization and Business Intelligence

The business intelligence has been transformed by the industry leading revolutionary brand Tableau creating much hype in the enterprise world throughout years.

NEW YORK, NEW YORK, UNITED STATES, November 10, 2016 /EINPresswire.com/ -- The business intelligence has been transformed by the industry leading revolutionary brand Tableau creating much hype in the enterprise world throughout the years. Now the Tableau developers have made some major updates to the greatest business intelligence solution for better utilization of its data visualization techniques.

Tableau 10 has been released by the developers and already a huge interest has been shown by the industry for it. The latest improvements in Tableau software are a big part of the effort the developers are making to improve the data visualization and data preparation capabilities of this amazing industry leader software for business intelligence. Now the data analytics are more deeply configured and they can provide much better analysis to the managers to make the critical business decisions with great information to rely on. Tableau consultants at Bilytica are using this amazing software solution to benefit the huge business community internationally. They have helped hundreds of businesses to improve the data visualization capabilities.

The updates to the user interface have also been released. The introduction of the new interface is going to simply energize the business managers and their overall business intelligence process. Bilytica also refers this software to all the large companies in the world. Tableau is improving day by day.
