

# ITSENCLOSURES Introduces the IceStation Titan NEMA 4 Computer Enclosure to Impressive Product Lineup

*ITSENCLOSURES is proud to add to the popular IceStation TITAN family of computer enclosures with the new NEMA 4 freestanding computer enclosure.*

MT. PLEASANT, PA, USA, November 18, 2016 /EINPresswire.com/ -- Since 1985, [ITSENCLOSURES](#) (Integration Technology Systems) has been designing and building the toughest computer, monitor, printer, and electronics' enclosures on the market. ITSENCLOSURES is pleased to add the [NEMA 4 TITAN](#) freestanding computer enclosure to the popular TITAN family. The NEMA 4 TITAN protects against dust, dirt, grease, and hose directed water in an industrial setting.

The NEMA 4 TITAN ([IS602827-04](#)) enclosure body is constructed out of 14-gauge welded steel and 12-gauge door thickness, and stands 60" High x 28" Wide x 27" Deep. The enclosure finish is a polyester powder paint available in blue, gray, or any custom RAL color.

The viewing window is hinged at the bottom and easily folds down to accept up to a 24" 16x9 wide screen monitor. Tempered safety glass or polycarbonate viewing windows can be installed on

the industrial enclosure. An adjustable monitor shelf with popular VESA mounting patterns is included for easy monitor installation. For space saving applications, the shelf can be used as a VESA mount, eliminating the need to use the monitor stand. In addition, the shelf can simply be used as a traditional monitor stand.

The enclosure doors feature quarter turn knob-style compression latches and dual durometer EPDM gasket for additional protection against a harsh environment. The lower front and rear doors utilize lift-off hinges for effortless removal of the doors. The rear door measures 51" High and is ideal for accessing the back of electronics stored in the enclosure.

"ITSENCLOSURES is excited to introduce a brand-new TITAN product. The NEMA 4 version will be a positive addition to the TITAN family, which continues to be ITSENCLOSURES' best-selling product line. The TITAN family accommodates today's electronics and are ergonomically designed workstations," said JT Spangler, President of ITSENCLOSURES. "After 31 years, ITSENCLOSURES continues to design and fabricate the toughest computer enclosures on the market.

ITSENCLOSURES plans to introduce additional industrial enclosure products in 2017.”

The TITAN features a sloped work surface, which provides room for documents, folders, and writing utensils. A retractable keyboard drawer, located below the work surface, is lockable and the perfect place to store and protect a keyboard, mouse, or pointing device. When fully extended, the front of the drawer easily folds down to provide an ergonomic wrist rest. The drawer measures 22.7" Wide x 9" Deep x 3.5" High.

The bottom half of the TITAN provides ample space to house a computer, printer, UPS, power supply, and

additional vital electronics. An adjustable shelf, attached to uni-strut, is also included for easy placement of electronics. Heavy-duty, swivel casters are a standard feature. When the enclosure is in its desired location, the front casters lock into place. For areas that require a stationary workstation, bolt down legs can be installed in place of the enclosure's casters.

The NEMA 4 PC enclosure features a viewing window that accommodates up to 24inch wide screen monitors.

“

“After 31 years, ITSENCLOSURES continues to design and fabricate the toughest computer enclosures on the market. ITSENCLOSURES plans to introduce additional industrial enclosure products in 2017.”

*JT Spangler*

Customize the NEMA 4 TITAN with various accessories; including sliding shelf brackets, 19" wide rack mount rails, sealed cable entry glands, power strips, industrial keyboards or various thermal management options, such as a heat exchanger.

Proudly 'Made in the USA,' ITSENCLOSURES ships all of its innovative products completely assembled and ready to use upon delivery!

About ITSENCLOSURES

Located 36 miles southeast of Pittsburgh in Mt. Pleasant, Pennsylvania, ITSENCLOSURES designs and builds the toughest computer enclosures on the market. NEMA rated PC enclosures are ideal for any and all environments where dust, dirt and exposure to liquids or corrosives are present.

ITSENCLOSURES' line of computer enclosures, printer enclosures, server enclosures, and LCD enclosures protect a company's investment and maximize the lifetime of the protected electronics. ITSENCLOSURES' products are always 'Made in the USA' and allow companies to safely use any computer or LCD monitor in the harshest operating environments. ITSENCLOSURES has been helping companies protect technology investments and realize the maximum life cycle of their equipment since its founding in 1985.
