Remote payments segment lead the market. This type of payment generally makes use of browser, mobile web/WAP, premium SMS, STK/USSD, and mobile applications and can be accessed over a subscriber's mobile phone bill, prepaid payments, and debit or credit card payments. These payments are easier for consumers as they can be done through any type of mobile phone, ranging from a basic handset to a Smartphone. Asia-Pacific is projected to record the largest market values as well as anticipated to grow with the highest CAGR during the forecast period. This is because of the large-scale approval of mobile money services by the users along with the presence of the large number of mobile subscribers in the region.
