

# mHealth Market is Massively Growing due to Proliferation of Smartphones and wearable Devices into Healthcare

*Market research future has a cooked research report on global mHealth market Information, By Therapeutics, By Application - Forecast to 2022*

PUNE, MAHARASHTRA, INDIA,  
November 25, 2016 /EINPresswire.com/  
-- Market Highlights

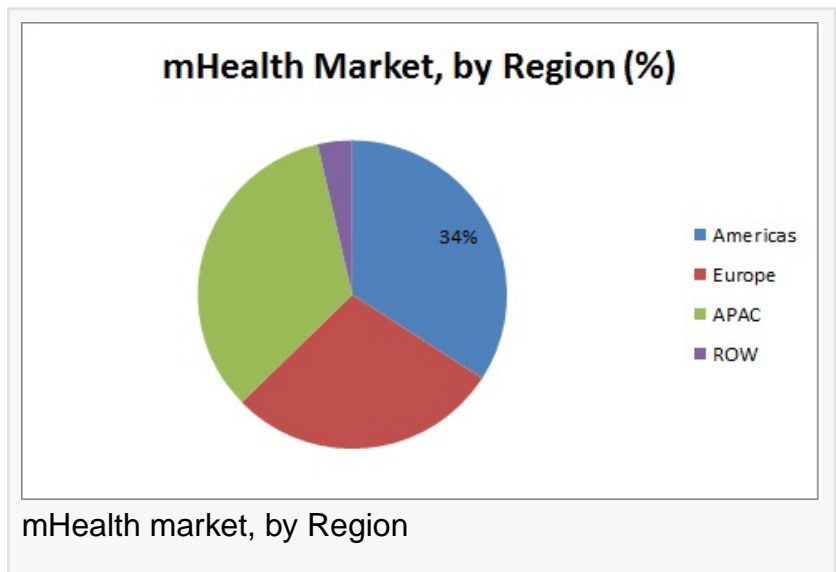

The global [mHealth market](#) has been examined as a swiftly growing market and expected to grow at a tremendous rate. Globally, market for mHealth is a high growth market. The growth of the market is majorly driven by proliferation of smartphones and wearable devices into healthcare. The mHealth Market is

based on the information communications technologies (ICT) network that complements services such as medical and health informatics. These mobile applications help consumers in storing their medical records to improve coordination among healthcare providers. mHealth devices create a platform that enables the providers and patients to contact one another quickly using SMS, calls, or Internet-based video links. For example, Apple launched the Apple Watch that contains health and fitness app and also measures heart rate; resulting in providing mHealth benefits to consumers.

The global mHealth market is expected to reach USD 79.38 Billion by the end of the 2022 from USD 8.98 Billion in 2015. mHealth Industry is expected to grow at 36.5% CAGR during 2016-2022

#### Market Research Analysis:

mHealth has an important quotient in the growth of healthcare market. In the coming years, it is expected that the mHealth market will advance with higher growth rate as compared to previous years. The current challenge for the market is low rate of literacy and language barriers in low- and middle-income countries (LMICs). This mainly attributes to the slow adoption rate of new technology by the healthcare industry. Such instances mainly occur in cases of older generation professionals who do not want to adopt or are having difficulty in adopting new technologies. Hence, this factor hinders the growth of the overall mHealth market.
