

# Most Modern Infrastructure Available for Laparoscopic and Robotic Surgery Training

*World Laparoscopy Hospital is a prestigious training center for the excellent quality of education in laparoscopic and robotic surgical procedures.*

GURGAON, NCR DELHI, INDIA, November 28, 2016 /EINPresswire.com/ -- Although laparoscopic surgery has been applied in practice by multiple surgical specialties for nearly two decades, the penetration of [laparoscopic surgery training](#) institute in the Asian Countries remains less than ideal. In today's world, surgical specialization that fail to update their advanced minimal access surgical learning practices often struggle with professional growth or productivity. As a result, leading hospitals are abandoning traditional methods of surgery in favour of more effective solutions.

It may be questioned why laparoscopy is not more widely practiced and the answer is that formal laparoscopic training is not being offered in most residency training programs. In these circumstances institutions like World Laparoscopy Hospital has great role in offering technology innovation that engage talent and improve performance by providing hands on laparoscopic and robotic surgery training to surgeons and gynaecologists.

World Laparoscopy Hospital is The Premier Institute of Minimal Access Surgery  
*Dr R K Mishra*

One-third of medical colleges are increasing their budget for learning and development of minimal access surgery. 41 percent of hospital describe their culture as “Day Care Surgery” and searching for skilled laparoscopic surgeon and gynaecologist. Only 10 percent of medical institutions are leveraging laparoscopic surgery learning solutions and have good infrastructure to provide hands on minimal access surgical skill. 59 percent of newly trained medical postgraduate surgeons and gynaecologists are leveraging learning activities in specialized institutes and searching a good institute to develop their fundamental minimal access surgical skill.

Medical institutes all over world are facing several critical pressures, including a short supply of skilled laparoscopic or robotic surgeons, gynaecologist and urologist. In these difficult situation where

World Laparoscopy Hospital

developing surgical skill of surgeon is required World Laparoscopy Hospital is prioritizing the Individual need of [learning laparoscopic surgery](#). Finding and keeping talented skilled minimal access surgeon is no longer an HR challenge but a strategic healthcare priority. There is need of institution like World Laparoscopy Hospital which provide a new scientifically proven mechanism for teaching laparoscopic and robotic surgery. This super specialized institute provide a service for minimal access surgeon from all over the world where they can adapt to the needs of a changing workforce and align closely with objectives of developing skill. For many conventional medical institute, an updated learning and development process is long overdue and WLH is trying to fulfil these objective.

Robotic Surgery Training at World Laparoscopy Hospital

#### Trends in Laparoscopic Training and Recommendations:

For those who may have only gained basic laparoscopic skills in residency and for those who graduated before any training was available, gaining expertise in laparoscopy after residency is a difficult task. World Laparoscopy hospital is trying to fill up these gap and imparting Hands On Skill to surgeons and Gynaecologist. Although learning is one of the most mature areas of continued medical institution, it is also one of the most innovative. With recent technology advancements and the rapid adoption of scientific collaboration, learning and development has come a long way. Yet making a decision to improve a minimal access surgery training program and invest in a learning management solution is often a daunting challenge. Five key trends and best practices that medical institution should consider include the use of virtual reality simulation technology, adoption of practical learning skill lab learning tools, use of adaptive skill based learning principles, and the ability to measure effectiveness of these training programmes.

Unfortunately, if surgeons flock to advanced laparoscopic surgery due to market pressures and patient demand without adequate training in laparoscopy itself, the likelihood of convincing such surgeons of the benefits of, and need for, laparoscopy training is low. Hands On laparoscopic surgery training given by World Laparoscopy Hospital is a methodology that breaks traditional models and allows surgeons and gynecologists to learn at their own pace. It has gained popularity with educational institutions, referred to as “adaptive teaching,” where a teacher will gather information on individual students to learn what they need to do to improve their learning. Minimal access surgical skill.

In the past scenario medical colleges had limited technology choices for learning and development of surgical skill, but today there are new solutions emerging every month. Organizations should consider providers with innovative capabilities like World Laparoscopy Hospital and also understand the importance of measuring the effectiveness of learning activities. Even if the surgeon’s laparoscopy training limited or only for a restricted set of operative procedures, the basic skills of laparoscopy, just as with open surgery, will benefit the surgeon in all regards, including in performing advanced minimal access surgery.

Due to one of the most advanced infrastructure available for laparoscopic and robotic surgery training

available on this planet, World Laparoscopy Hospital is a prestigious training center in the World recognized nationally and internationally for the excellent quality of education in laparoscopic procedures. This institute provide complete hands on training to surgeon and gynecologist during their [Fellowship and Diploma in Minimal Access Surgery Program](#).

Regular courses are being conducted in laparoscopic Surgery for General Surgeons, Gastroenterologists, paediatric. Surgeons, Cardio-Thoracic Surgeons, Gynaecologists & Urologists for the past 17 years at WLH. More than 7000 Surgeons and gynecologists have benefited in the art of Laparoscopy in India and abroad.
