

Organisations encouraged to start their ISMS implementation projects by creating ISO 27001-compliant documentation

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, November 29, 2016 /EINPresswire.com/ -- IT Governance, the leading provider of cyber security and ISO 27001 expertise, is encouraging organisations to start their ISO 27001 compliance projects with IT Governance's No. 3 Comprehensive ISO 27001 ISMS Toolkit.

Developed by ISO 27001 practitioners, the [No.3 Comprehensive ISO 27001 ISMS Toolkit](#) is designed to help organisations implement an information security management system (ISMS). The toolkit helps organisations reduce implementation costs by providing a range of tools, including the official ISO 27000 standards, industry-leading implementation guidance, pre-written documentation and risk assessment software.

The duration of an ISO 27001 implementation project depends on the size of the organisation, the scope of the project, and the resources and skills available. Even so, in the ISO 27001 Global Report 2016, more than 50% of surveyed organisations [reported](#) that it took between 6 and 12 months to achieve ISO 27001 certification. Moreover, 32% of the organisations surveyed used documentation toolkits to achieve and maintain their ISO 27001 certification.

Alan Calder, the founder and chief executive officer of IT Governance, said: "Implementing an ISO 27001-compliant information security management system requires information security professionals to put a substantial amount of time and effort into researching, developing and approving each policy and procedure. Our No.3 Comprehensive ISO 27001 ISMS Toolkit contains hundreds of documents and templates intended to help organisations meet the documentation requirements of ISO 27001:2013 and reduce room for error."

IT Governance's No.3 Comprehensive ISO 27001 ISMS Toolkit is suitable for organisations worldwide of any size and enables them to accelerate their ISMS implementation project while reducing their costs.

In addition to ISMS documentation templates, the No.3 Comprehensive ISO 27001 ISMS Toolkit includes the risk assessment software tool vsRiskTM, which is indispensable in tackling the complex task of risk assessments and can help save time, effort and expense.

The documentation toolkit delivers return on investment by reducing room for error, saving time and costs, and providing organisations with expertly developed, established methods for implementing an ISO 27001-compliant ISMS.

For more information about IT Governance's No. 3 Comprehensive ISO 27001 ISMS Documentation Toolkit, please visit IT Governance's [website](#), contact their consultancy team direct at servicecentre@itgovernance.co.uk or call them on +44 (0)845 070 1750.
