PUNE, INDIA, December 5, 2016
/EINPresswire.com/ --

The analysts forecast the [global stock market software industry](#) to grow at a CAGR of 8.36% during the period 2016-2020.

Trading software helps analyze the trading of financial products such as stocks and currencies. This software is usually developed by brokerage firms to meet the specific needs of their clients. It helps brokerage firms to manage client accounts through the internet. Stock market software provides a powerful analysis and in-depth comparison of stocks, enabling investors to take critical trading decisions.

Growth is expected to stem from emerging nations with special initiatives such as South-South trade, which has led to a rapid increase in trading opportunities for the nations in that area. South-south trade refers to trade between the developing countries, or more specifically, countries of global south. In addition, various bilateral agreements and FTAs have led to a favorable trade environment among emerging nations, facilitating the growth of the global financial markets.
