

MedRecordz expands its product portfolio with DrRecordz: A practice management solution for doctors

HYDERABAD, INDIA, December 5, 2016 /EINPresswire.com/ -- eHealthcare provider MedRecordz today launched DrRecordz, a unique practice management solution for doctors. A two year old start-up, MedRecordz is a provider of integrated electronic platform of mobile, web and client applications connecting healthcare providers such as diagnostic centres, physicians, dentists, eye clinics, hospitals and pharmacies with their consumers.

Its existing product range includes MedRecordz, a mobile application for consumers to store & manage their medical records, LabRecordz, a solution for diagnostic centres to automatically deliver lab reports to their customers through the MedRecordz mobile application, and OptiRecordz, a mobile application for optometrists to manage their customer records.

Using the DrRecordz Android mobile app, doctors can now manage and track their patient records and clinic operations over a mobile phone. The clinic operations are streamlined significantly enhancing the quality of service to the patients and resulting in higher monetization. Key features of the application include

1. Patient registration (walk-in & telephonic) and appointment management
2. Patients can book their appointments online via social media
1. Update patients about their current status in the queue as they are waiting for the doctor
2. Automatic SMS reminders to patients for future visits
3. Patient history including prescription storage
4. Option to write digital prescriptions using an extensive database of lab tests OR to capture a written prescription using the phone's camera
5. Send prescriptions automatically to the patient's preferred diagnostic centre
6. Receive lab test reports directly from the diagnostic centre and review them over the mobile phone
7. For pediatricians, an ability to manage and track child Immunizations, and Height & Weight.

Founder and MD, Venkat Suravarapu said, "We are very excited to add DrRecordz to our existing product portfolio. DrRecordz in its beta phase has been well received and nearly 100 doctors are utilizing the service. This is an efficient and time saving method for the doctor/doctor's reception to manage patient appointments, registrations and prescriptions among others".

Entrepreneur and Co-Founder Sastry Chemudapaty added, "MedRecordz's product platform has two main elements: "discovery" and "decision-making". Most ehealth solutions focus on the discovery part, but not on the decision-making part. These solutions enable a consumer with a dental problem to discover the dentists in the neighborhood, but do not provide adequate basis to identify the right dentist. Using our platform, the consumer can not only "discover" the right healthcare provider, but also "make the right decision". Our healthcare provider review system ensures that consumers have immediate access to their friends' and families' reviews of the healthcare provider that they just discovered. These reviews will enable the consumers to make the right healthcare decisions for their families and themselves.

About MedRecordz:

MedRecordz is an interconnected network of mobile, web and client solutions that connect healthcare providers such as diagnostic centres, physicians, dentists, hospitals, eye clinics and pharmacies with their consumers. Using the MedRecordz platform, consumers can manage their interactions with healthcare providers, and make informed & timely healthcare decisions that enhance their health lifestyle. These actions, in turn, add sustainable business value to healthcare providers.
