Grid Computing Market 2016 Global Players Forecast and New Project Investment Feasibility Analysis to 2022

Global Grid Computing Market that contains the information by Graphic Type, by Components, by Application, by End Users - Forecast 2016-2022

PUNE, MAHARASHTRA, INDIA, December 6, 2016 /EINPresswire.com/ --
Target Audience
• Software Developer Companies
• Cloud Service Providers
• Cyber Security Companies
• Manufacturing Companies
• Networking Companies
• Data Centers

" We enable our customers to unravel the complexity."

Market Research Future

Market Scenario
Grid computing can be explained as a distribution system wherein computing resources are distributed/shared across networks. As technologies enables universal transparent access to documents, grid promises do so for computing resources. Grid computing allows the user for selection, aggregation, and sharing of information in multiple administrative domains and also across the geographic areas.

Key players
• Oracle (U.S.)
• Apple Computer (U.S.)
• Dell (U.S.)
• Sun Microsystems (U.S.)
• Hewlett-Packard HP (U.S.)
• Sybase (SAP) (U.S.)
• Platform Computing Inc. (U.S.)
• IBM (U.S.)
• DataSynapse Inc. (U.S.)

Market Segmentation
Segmentation by Graphic Type
• Discrete Graphics
• Integrated Graphics

Segmentation by Components
• Video Graphics Array
• USB
• Peripheral Component Interconnect Bus

Segmentation by Application
• Utility Computing
• Datacenter
• Software as a Service (SaaS)

Segmentation by End Users
• IT & Telecommunications
• Consumer Electronics
• BFSI
• Healthcare
• Education
• Government

Taste the market data and market information presented through more than 70 market data tables and figures spread in 110 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "Global Grid Computing Market Research Report- Forecast 2022"

Regional Analysis
North America is dominating the market of Grid Computing with the market share of XX%. Low ownership cost and high efficiency of computing, data, and storage resources are driving the market of Grid Computing. Europe stands as second biggest market for Grid Computing with the market share of XX% and has been valued at US $XX billion in the year 2015. Asia-Pacific has emerged as fastest growing market for the Grid Computing with the CAGR of XX% and has been valued at US $XX billion in the year 2015. It is expected that Asia-Pacific will reach market size of US $XX billion by the end of forecasted period.

Industry News
In September 2016, Binghamton University announced that a new service developed at campus could help in the improvement of overall performance of mobile devices which saves data on cloud.

The report for Global Grid Computing Market of Market Research Future comprises of extensive primary research along with the detailed analysis of qualitative as well as quantitative aspects by various industry experts, key opinion leaders to gain the deeper insight of the market and industry performance. The report gives the clear picture of current market scenario which includes historical and projected market size in terms of value, technological advancement, macro economical and governing factors in the market. The report provides details information and strategies of the top key players in the industry. The report also gives a broad study of the different market segments and regions.
