Virtualization Security Market Research, Growth, Share, Industry Trends and Analysis, Forecast to 2027

Virtualization Security Market, by End-user (IT, Government), by Infrastructure (Virtual Machine), by Type (Software), by Service (Consulting) - Forecast 2027

PUNE, MAHARASHTRA, INDIA, December 7, 2016 /EINPresswire.com/ -- Market Scenario

" *We enable our customers to unravel the complexity.* "

Market Research Future

The major growth driver of Virtualization Security Market includes growing demand for cloud computing and increasing demand for managed security services, and increasing demand for identity and access management among others.
Hence the market for virtualization security is expected to grow at XX% CAGR (2016-2027).
However, growing cyber-attacks and lack of technical expertise are the factors which are hindering the growth of Virtualization Security Market.

Objective of Virtualization Security Market Study:

• To provide detailed analysis of the market structure along with forecast for the next 10 years of the various segments and sub-segments of the global virtualization security market.
• To provide insights about factors affecting the market growth.
• To analyze the virtualization reality market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
• To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW).
• To provide country level analysis of the market with respect to the current market size and future prospective
• To provide country level analysis of the market for segment by type, services, end-users, infrastructure and sub-segments.
• To provide strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
• To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the global virtualization security market .

Segments

Global Virtualization Security Market can be segmented as follows:
• Segmentation by Type: Hardware (Networking), Software (System & networking management, security management, operating system, virtual client computing software).
• Segmentation by Services: Integration & design, consulting, and support & maintenance among others.
• Segmentation by End-users: Cloud service provider, IT, telecommunication, healthcare & retail, government (BFSI), and large enterprises among others.
• Segmentation by Infrastructure: Virtual switch, Hypervisor, web server, and virtual machine.

Regional Analysis of Virtualization Reality Market:

North-America dominated the global virtualization security market with the largest market share due to high trend of server virtualization in US and also because of its one of the most frequent attack country in the region, and therefore accounting for $XX million and is expected to grow over $XX billion by 2027. Virtualization security market in European market is expected to grow at CAGR of XX% from $ XX million in 2016 to $XX million by 2027. The Asia-Pacific market for virtualization security market is expected to grow at XX% CAGR (2016-2027).
Taste the market data and information presented through data tables and figures spread 100 pages of the project report. Avail in-depth table of content (TOC) & market synopsis on "[Virtualization Security Market Research Report- Global Forecast to 2027](#)"

Key Players

Some of the major players in Global Virtualization Security Market
• Altor Networks (U.S.),
• Trend Micro Inc. (Japan),
• Symantec Corp. (U.S.),
• VMware Inc. (U.S.),
• Fortinet Inc. (U.S.),
• Hewlett-Packard (U.S.),
• Dell Inc. (U.S.),
• Ericsson Networks (Sweden),
• Intel Security Group (U.S.),
• CA Technologies (U.S.)
• Oracle Corporation among others.

Industry News:

• Cisco has announced in June 2016 about its new platform "Cisco tetration analytics" which is been designed to help customers to gain visibility over data centers in real time. The device collects telemetry information from hardware and software sensors and conduct analysis with the help of advanced machine learning techniques.
• Oracle has announced in June 2016 about its new development SPARC which is designed to bring security, efficiency, and simplicity on cloud platform.

Americas

• North America
o US
o Canada
o Latin America

Europe
• Western Europe
o Germany
o France
o U.K
o Rest of Western Europe
• Eastern Europe

Asia– Pacific
• Asia
o China
o India
o Japan
o South Korea
o Rest of Asia Pacific
The Middle East & Africa

About Market Research Future:

At [Market Research Future (MRFR)](), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.
MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.
