PUNE, INDIA, December 8, 2016 /EINPresswire.com/ -- [Global Hematology Analyzers and Reagents Market](https://www.einpresswire.com/story/view/38302-global-hematology-analyzers-and-reagents-market-2015-2019)

Hematology instruments are indispensable diagnostic tools and continue to sustain a strong position in the Global Healthcare industry. They include analyzers, flow cytometers, coagulation analyzers, and slide strainers. Hematology analyzers are computerized and highly specialized machines that determine the presence, count, and types of cellular elements in a blood sample for disease detection and monitoring. They are also used to determine non-cellular parameters of the blood such as hemoglobin and hematocrit. Samples of blood can be processed alone, in batches, or continuously in a hematology analyzer. Hematology reagents are used in conjunction with the analyzers.
