

BioSSL wins the precious Sesames Award Trustech 2016 for best Cybersecurity Solution.

WELLINGTON, SOMERSET, UNITED KINGDOM, December 8, 2016 /EINPresswire.com/ -- As part of the 3 finalist in category Cybersecurity ((Data safeguarding, resilience of infrastructures, resistance to cyberattacks), [BioSSL](#) became finalist at Trustech 2016 in Cannes, France.

The Sesames Award jury was composed of Frazier Evans, Payments Director Booz Allen Hamilton, Nathan Hilt, Director Payments PriceWaterhouseCooper, Al Pascual , SVP, Research Director and Head of Fraud & Security Javelin Strategy & Research, Kevin Gillick, Executive Director GlobalPlatform, John Devlin, Principal Analyst and Founder P.A.ID Strategies, and Max Snijder, CEO European Biometrics Group.

BioSSL changes the perception of the use of biometrics in cybersecurity and how to secure completely the user's identity in the online world. BioSSL's market is anywhere that users need to be authenticated with zero risk.

More about BioSSL

BioSSL is an advanced biometric platform which secures online financial and confidential document transactions as well as other high risk web based environments.

The platform uses Fingerprint, Face and Voice Recognition as advanced biometric technologies. The system does NOT store any images, scans or biometric features on the local device or the server.

BioSSL creates each time a unique biometric One Time Password.

The desktop and mobile application integrates smoothly into existing payment solutions, like online banking and payment terminals.

BioSSL is an 'omni' channel solution for banks, financial institutions, eCommerce and eGovernment.
