PUNE, INDIA , December 9, 2016 /EINPresswire.com/ -- [Glbal Data Center Outsourcing Market](#)

Data center outsourcing is the process in which an enterprise outsources its IT infrastructure and its management to third-party vendors that have expertise in deploying and maintaining data center facilities. These vendors provide end-to-end management of data center services in addition to supporting additional storage, security, and disaster management solutions. Increasing focus towards rising energy issues, high adoption of green data center solutions and push towards sustainable infrastructure solutions are some of the key growth drivers of the global data center outsourcing market. Growing industrialized infrastructure, especially in emerging economies, is also driving the demand for various data centers outsourcing services & solutions.

The shift towards IUS (Infrastructure Utility Service) or IaaS (Infrastructure as a Service) will propel the growth of the data centers outsourcing market during the forecast period. The demand for IUS or IaaS is growing rapidly owing to widespread acceptance of using shared infrastructure to reduce costs and boosts productivity. Moreover, managed virtual private cloud services such as virtual storage and shared computing are in popular demand and will further fuel the growth of this market. However, factors such as complexity of data center infrastructure and limited operating expertise will restrain the growth of the global data center outsourcing market during the forecast period.
