

InfoSecure Redteam Achieves Status as a PCI SSC Authorized QSA Company

The PCI Security Standards Council certifies InfoSecure Redteam as a QSA Company (QSAC).

KERRVILLE, TEXAS, USA, December 9, 2016 /EINPresswire.com/ -- [InfoSecure](http://InfoSecure.com)

Redteam, Inc. ("InfoSecure"), a leader in investigations, compliance, and security announced that the Payment Card Industry Security Standards Council ("PCI SSC") has certified InfoSecure as a Qualified Security Assessor Company ("QSAC") in the United States. This designation affirms InfoSecure's expertise and authority to, at a minimum, evaluate a client's security infrastructure, procedures, policies, networks, and systems to ensure an organization is protecting clients' payment data in compliance with the PCI Data Security Standard PCI DSS.

“

This elite certification reflects InfoSecure's dedication to providing clients across the United States with the most comprehensive cyber security solutions

Patrick Bass

The PCI SSC was founded in 2006 by American Express, Discover Financial Services, Japan Credit Bureau International, MasterCard, and Visa Inc., all of which incorporate the PCI DSS for their data security compliance programs. QSAC's perform onsite assessments for entities that store, process, and transmit cardholder data, and prepare appropriate compliance reports required by payment card brands and acquiring banks. There are only 183 QSAC's

authorized to perform work in the United States.

“This elite certification reflects InfoSecure's dedication to providing clients across the United States with the most comprehensive cyber security solutions,” said Patrick Bass, Chief Executive Officer of InfoSecure. “For clients handling payment card data, our QSAC designation adds to the many cyber services we already offer in the marketplace. We are now in a much greater position to help organizations improve their information security while working to prevent and remediate cyber-related challenges.”

About InfoSecure:

InfoSecure is the leading provider of cyber-security solutions. The Company has helped clients make confident risk management decisions about people, assets, operations and security through a wide range of investigations, cyber security, due diligence and compliance, physical and operational security and data and information management services.
