

TieTechnology's New Customer, Black and White Taxi, is Reaping the Benefits of New Hosted VoIP Provider Plans.

Businesses, like Black and White Taxi, can now find that TieTechnology will be offering exceptional service at an affordable cost.

TAMPA, FLORIDA , USA, February 12, 2017 /EINPresswire.com/ -- There's a new challenge to [Cisco IP phones](#) in the Voice over Internet Protocol business technology sector, thanks to new offerings of exceptional communications services provided by TieTechnology. Superior voice and data reception and transmission are the centerpieces of these systems that specifically are designed with the end user in mind. The systems are intuitive and incorporate some feature options, and companies like Black and White Taxi are reaping the benefits.

Voice over Internet Protocol technology certainly isn't new to the communications or business sectors. However, improved infrastructure and faster connections now make it possible for companies to take advantage of the very [best hosted VoIP solutions](#). The benefits of this technology are numerous and provide businesses with greater opportunities through communications:

Communications cost control. Traditional telephony systems, which often rely heavily on outdated, cumbersome technology decades and decades old, is very expensive. While consumer and commercial rates have dropped slightly, need to pass along maintenance and repair infrastructure costs remain a reality. VoIP utilizes Internet communication, which is often far superior and more reliable. Also, it costs a fraction of traditional landlines.

Adaptable to change. When a business expands its presence into new localities, it must stay in communication with its home office. Also, it must be able to provide the free ability for employee communication and collaboration, and customer service. [VoIP business phone service](#) VoIP business phone

service makes it easy to adapt to changes without technological skill or large, bulky equipment.

More free feature options. Some traditional telephone companies make a profit by charging for every

added service a business uses. While these are often inexpensive line items, totaled together, they can up to a lot of money. VoIP gives businesses the ability to add or remove phone and communication feature services at no cost. Such features include voicemail, video and voice conferencing, voicemail and fax via email, and more.

Companies also enjoy tracking capabilities for expenses. VoIP users can access all user history and make changes as necessary. Voice over Internet Protocol is regarded as superior in all aspects of business communications. These systems are more reliable, provide better quality, and offer more flexibility than traditional telephony at a lower cost.
