Flower Shop Buyer's Guide Compares VoIP Services To Find Best Rates For Users Of RTI, DOVE, MERCURY or FLORAL PRODIGY

Teleflora affiliated flower shops like hosted business phone services to leverage call tracking, call reporting, call monitoring and mobility technology.

TAMPA, FLORIDA, USA, February 19, 2017 /EINPresswire.com/ -- Flower Shop owners nationwide are constantly reassessing operating costs, looking for ways to improve cash flow. Communication providers utilize technological advancement. For instance, Cisco IP phones are renowned, and now, there is a new company, TieTechnology, which offers advanced communications tools like an onsite hosted phone service Buyer's Guide, for free along with call reporting and call tracking services at a low cost. These

Enterprise Phone Systems

systems provide businesses with affordable growth solutions without technological expertise. Voice over Internet Protocol, or VoIP, is fast becoming the new standard in business communications for several reasons.

Multiple Connection Points

[Flower Shop owners can connect via our mobility app, Google Chrome Dialer,](link) computer, tablet, smartphone, and traditional landline with ease. Numbers and extensions can be created, deleted, and managed from multiple devices wherever an internet connection is available. Also, mobility is greatly

improved, allowing team members to collaborate and provide better customer experience.

Improved User Experience

Traditional landline telephones rely on decades-old technology that requires substantial capital investment for acquisition and maintenance. VoIP offers ease of use, providing many communications and data features without the need for technological expertise. These allow for more robust and flexible communications, backed by the security and power of cloud computing. TieTechnology phone service and systems are also beating alternative IP phones in user experience and customer satisfaction.

Affordable Cost

Hosted phone services are available at a significantly lower acquisition and usage cost. It beats traditional telephony in many ways, from offering more features to more affordable cost. Traditional landlines are costly and unwieldy systems that require dedicated maintenance to operate properly. Also, these cheap business IP phones deliver higher quality.

Simple Upgrades

Traditional landline upgrades are time-consuming and expensive. It takes technological know-how to setup and configure landlines, but VoIP systems are simple to upgrade. Instead of relying on outdated technology, VoIP offers many business grade features that are easy to add or remove. Numbers and extensions are simple to manage and can be done with a wide array of devices, needing only an internet connection.

Easy Customization

Traditional landline services charge separate line items for each feature. Though, some are bundled; tiers may come with a high cost. Hosted phone services bundled with Floral Prodigy offer a substantial number of call and data features, which include call waiting, call routing, call forwarding, voicemail, and voicemail to email.
